Rainbow Circle Spawner

Pixel Paper - 800 x 600
Graph Paper for Screen Coordinates

- Circles will shrink and disappear after a certain amount of time
- Circles will have different colours every time
- Left hold will spawn a stream of circles

3 Concepts for interactive 2D toy:

1. bouncing square on click

- It's a square that can bounce itself when left click
- square could be one colour, or rainbow

2. falling circle clicker

- spawns circles that have gravity and falls to the ground once spawned
- circles will be various colours/sizes
- faster clicking = more circles spawned

3. block building?

- similar to the circle one, but spawns squares instead and will have physics/collisions
- squares will have different colours, but same size
